

Samuel Nii Owusu

Software Developer | Toronto, ON, Canada | +1(437)-261-0240 | samuelnii6000@gmail.com | github.com/SamuelNii32

EDUCATION

Humber Polytechnic Postgraduate Degree Web Development	Toronto, Canada 01/2025–12/202
University of Ghana BSc Computer Engineering	Accra, Ghana 09/2017–10/2021

PROJECTS

IoT-Enabled Smart Door for COVID-19 Safety Monitoring | Raspberry Pi, Python, TensorFlow, MobileNetV2, CNN, PyQt6, Django, MySQL.

- Developed the face mask detection module using MobileNetV2 and CNN to classify mask status for COVID-19 compliance.
- Integrated IR temperature sensor readings into the automated door system for real-time access control.
- Implemented features in the Django + PyQt6 dashboard to log entries and display temperature/mask data for administrators.

Locker Room Vibes CMS | ASP.NET Core MVC, Entity Framework Core, Razor Views, Bootstrap 5

- Developed a full-stack CMS to manage playlists and team data using ASP.NET Core and EF Core
- Built RESTful APIs and integrated Razor front-end views for real-time data updates, improving user experience
- Implemented CI/CD pipelines in GitHub Actions and followed Agile sprints to coordinate development and testing

Nuit Blanche Redesign | React, Vite, Tailwind, shadcn/ui, Git, Agile

- Rebuilt the event platform interface using React and Tailwind, delivering a mobile-first and accessible design
- Collaborated in Agile sprints with UX designers using Git for version control, implementing interactive layouts that improved usability.

EXPERIENCE

Data Analyst	11/2021–07/2023
<i>Bulk Oil Storage And Transportation Company Ltd</i>	Accra, Ghana
• Designed a centralized SQL database to reduce document processing time by 40% • Automated reporting with Python scripts, cutting report generation time by 50% • Implemented data validation checks and audit logs to improve compliance and reporting accuracy	
Network Support Intern	08/2020–09/2020
<i>Ghana Broadcasting Corporation</i>	Accra, Ghana
• Resolved over 25+ critical IT issues, improving network uptime and increasing user satisfaction across departments. • Configured routers, printers, and LAN components, reducing troubleshooting time by 20%.	

TECHNICAL SKILLS

Programming & Tools: C++, Python, C, JavaScript, SQL, MATLAB, PHP | React, Django, ASP.NET Core MVC, EF Core, Bootstrap, Tailwind, shadcn/ui | CI/CD, REST APIs, Git, Agile, Object-Oriented Programming, Network Protocols, Embedded Systems
